Validator Provided

Audit Information

Water System Name: Twentynine Palms Water District

Public Water System Identification (PWSID)[1]: CA3610049

[1]List only 1 PWSID, which should match the PWSID on the FWAS Instructions Tab. For Special cases where multiple water systems are connected with permanent two-way interties, list those additional PWSIDs in the **Notes** below and describe the water distribution system(s) configuration.

PWSID and Water System Configuration Notes (Provided to Validator by Water System):

Audit Period: CY2020

Validation Date: 9/15/2021

Sufficient Supporting Documents Provided: Yes

Water System Representatives

Matt Shragge, Mike Minatrea, Lauren Everett

Validation Findings & Confirmation Statement

Key Audit Metrics:

Data Validity Score: 71 Data Validity Band (Level): Band IV (71-90)

Non-revenue water as percent of cost of operating system: 3.0%

Real Loss: 26.49 gal / conn / day

Apparent Loss: 3.85 gal / conn / day

ILI: 1.09

Certification Statement by Validator:

This water loss audit report has been Level 1 validated per the requirements of California Code of Regulations Title 23, Division 2, Chapter 7 and the California Water Code Section 10608.34.

All recommendations on volume derivation and Data Validity Grades were incorporated into the water audit. ☒

If not, rejected recommendations are included here:

Certified Validation Report Template, Part B: Provided by Utility

Utility Provided

Water System Name: Twentynine Palms Water District

Public Water System Identification (PWSID)[2]: CA 3610049

[2]List only 1 PWSID, which should match the PWSID on the FWAS Instructions Tab. For Special cases where multiple water systems are connected with permanent two-way interties, those additional PWSIDs should have been listed in the Notes section on Page 1 by the Validator.

Water Audit & Water Loss Improvement Steps:

1. Steps Taken: *Water System to identify steps taken* ***in the preceding 3 years*** *to increase data validity, reduce real loss, and reduce apparent loss as informed by the annual validated water audit:*

The district has implemented a system wide AMI meter program. This system helps us monitor resident accounts and has the capability to send alerts when meters are in continual use. All residential meters in the district are new meters and more accurate than the older meters. The district has also installed PSI loggers in the SCADA system to track PSI throughout the system. We believe monitoring the PSI could also allow us to catch leaks in real time.

2. Planned Steps (OPTIONAL): If your audit reflects *negative real losses or the cost of non-revenue water is greater than 100% of the operating costs (issues for which your audit will not meet code requirements), you will be asked what steps you are planning in the coming year to address these issues. If you already know what steps you plan to take, you may list them here. If not, please prepare a response within 90 days (23 CCR Section 638.6[a]).*

The district is planning to install all of our commercial and large meter into the AMI meter program. Once we go AMI with the commercial and larger meters, the district will be 100 percent AMI and monitoring all active meter will reduce real losses.

3. Certification Statement by Utility Executive:

This water loss audit report meets the requirements of California Code of Regulations Title 23, Division 2, Chapter 7 and the California Water Code Section 10608.34 and has been prepared in accordance with the method adopted by the American Water Works Association, as contained in their manual, *Water Audit and Loss Control Programs, Manual M36, Fourth Edition* and in the Free Water Audit Software version 5.
